

CONFIDENTIAL

18 November 1983

MEMORANDUM FOR: Information Services Planning Working Group

FROM : Chairman

SUBJECT : Minutes and Draft Report

1. Attached are two items: (1) minutes of our 10 November meeting; and (2) a draft preliminary report of our deliberations. Note that our report to the ISB will be presented jointly with that of the Requirements and Technology Acquisition Working Group. By all means look at the entire report, but please focus on (1) the overall organization of the report, and (2) the planning section.

2. Please send me written comments by COB on 2 December.

MEMORANDUM FOR: Information Services Planning Working Group

FROM: [redacted] Chairman

SUBJECT: Minutes of 10 November 1983 Working Group Meeting

1. The Information Services Planning Working Group met on Thursday, 10 November 1983. Participants included [redacted]

2. [redacted] convened the meeting asking for corrections to the minutes of the 10 November meeting. No corrections were noted. [redacted]

3. [redacted] briefed the working group on the status of the local area network (LAN) study being done by MITRE for the Office of Communications. His presentation included some background information on LANs and a status report on the study and the work likely to grow out of the study. [redacted] informed us that the current focus was on requirements. Members voiced some doubt that the requirements survey and the subsequent validation and prioritization of the requirements, not to mention the cost/benefit tradeoffs to be made in the design phase, should be done by OC alone, as is the current plan. Members felt strongly that a broader constituency should be represented in the decision-making apparatus that will be shaping the LAN. [redacted]

4. Using [redacted] LAN presentation as a specific, current example of how major Agency systems are planned, the group went on to discuss the requirements for a long-range Agency information services plan. All members agreed that the LAN effort would be much better focused, and the results likely better, if OC had some overall context within which to work. For example, having a target figure for the number of terminals to be installed at Headquarters by 1990 would be most helpful to their study. Such a figure probably would be part of a long-range Agency plan. [redacted]

5. [redacted] spoke briefly about the Workstation Environment Working Group's preliminary report, summarizing its recommendations. She

CONFIDENTIAL

also relayed Mr. Brigg's sentiment that {the Agency has no critical ADP ← we sure worry a lot about now-problems!
 problems at present. But he wants to be sure that the decision process works well and that adequate coordination occurs to avoid future problems.

6. Returning to the subject of a long-range plan, the group agreed that the most important contribution of such a plan would be to provide the best possible future view of the Agency. Such a view would provide a single, consistent, comprehensive set of assumptions for lower-level decision makers to use in planning their programs. *** Great But why is this not developed. Everything would flow beautifully if this was pushed to conclusion.*

7. [] asked the group to send him their views of what the most important problems were that we should be addressing. He will distribute a written composite of these problems to members before the next meeting, which the group then can discuss and refine. []

8. The next meeting of the Information Services Planning Working Group is scheduled for Thursday, 8 December 1983, at 1330 hours in Room 4E05 Headquarters. The agenda for the meeting, which is scheduled for 90 minutes, is as follows:

- o Approve the minutes of the previous meeting.
- o Take care of any old business.
- o Discuss the draft working group report. []

O/Compt/IHG [] (17 Nov 83)
